

The European Parliament's Science and Technology Options Assessment Panel (STOA) partnered with the SAFE consortium to organise a timely workshop, **FOOD-RELATED HEALTH RISKS AND TECHNOLOGIES TO INCREASE FOOD SAFETY** which took place on 20 October 2016 in the European Parliament.

This informative workshop offered a holistic view of food safety putting the risks, and the technologies to address them, in perspective.

There were over 100 attendees who listened to expert speakers and participated in question and answer sessions with representatives from top European universities, private industry, national research centers, the European Commission and the keynote speaker, the European Commissioner for Health and Food Safety, Vytenis Andriukaitis.
